~~Alg1.6 Introduction to Quadratic Functions. In this unit, students study quadratic functions systematically. They look at patterns which grow quadratically and contrast them with linear and exponential growth. Then they examine other quadratic relationships via tables, graphs, and equations, gaining appreciation for some of the special features of quadratic functions and the situations they represent.~~

~~Because the inputs -1 and 3 produce an output of 0, they are the zeros of the function $f(x)$. And because both $f(x)$ values have 0 for their $f(y)$ value, they also give us the $f(x)$ -intercepts of the graph (the points where the graph crosses the $f(x)$ -axis, which always have a $f(y)$ -coordinate of 0). So, the zeros of a function have the same values as the $f(x)$ -coordinates of the $f(x)$...~~
