Bridgeport Manuals User Guides - CNC Manual

Get up on the machine table and look down at where the Pins screw into the Bearing sleeve. You will see a couple of small set screws that screw into the Cam Ring Pins and hold them in place. Look off around 30 degrees and you will see another set of holes for those set screws. Bridgeport drilled another set of holes in the Pulley sleeve.

Milling is the process of machining using rotary cutters to remove material by advancing a cutter into a work piece. This may be done varying direction on one or several axes, cutter head speed, and pressure. Milling covers a wide variety of different operations and machines, on scales from small individual parts to large, heavy-duty gang milling operations.

Look for a BOSS 1 to 4 or an MDI machine. These were made as CNC, ballscrews, pressure oiling, a really nice quill where the ball screw is actually around the quill and not an add on that just wants to lever the quill sideways. Downside of these machine which is in your favour is the electrics were crap, sorry make that shit.
