Online Library Obstetrics And

Gynecology Question 5

Explanation:

Hyperemesis gravidarum is a severe form of morning sickness in which women suffer from excessive nausea and vomiting which prevents them from taking in adequate amounts of food and water.

Online Library Obstetrics And

It is thought to be caused by high levels of circulating HCG. This is supported by the fact that it's more common in multiple pregnancy and also tends to only affect women during the first 12 weeks of pregnancy.
